Georgi Manov

Senior Software Engineer at SoftServe
Lozenets

Summary

Summary of Qualifications I have over 5 years of experience of software development. During that time, I participated in more than 5 projects of various sizes and complexity. Have strong experience in various programming languages and technologies.

Most of my expertise is development of C# applications including back-end and front-end parts of application, issue detection and resolving. On most of the projects, I have performed design and development activities.

I have strong understanding of the object-oriented concepts, design patterns and different SDLC processes. I have been involved in several major long-term projects, which gave me strong experience in various areas of software design and development. Most of the projects I took part in were handled with Scrum. Therefore, I have experience and good understanding of this methodology. I also have strong technological knowledge and experience in JavaScript, HTML, and CSS designing, maintaining relational DB.

I am always open to new challenges with interest and enthusiasm. I have very good skills in problem solving. I am open-minded and goal-oriented. I have an active teamwork attitude and quick learning.
